

Civil Engineer - Solid Waste

Kenvirons, Inc. is a civil and environmental engineering firm headquartered in Frankfort, KY. Established in 1975, Kenvirons is a team of technically oriented professionals dedicated to providing sound consulting services and client satisfaction. As part of our team, the successful applicant will work with staff members on designing solid waste landfills, observing and documenting construction, and coordinate environmental field sampling and monitoring.

Responsibilities:

- Solid Waste Landfill Design including grading plans, volume calculations, slope stability, stormwater and silt management facilities, leachate collection, and landfill gas collection systems
- Preparation of plan and specifications for construction bid
- Construction Quality Assurance (CQA) monitoring
- Collaborate and coordinate with staff and management

Qualifications:

- 0 to 2 years of engineering experience with landfill design
- Bachelors of Science in Engineering
- AutoCAD/Civil 3D
- Proficient in Microsoft Office
- Good communication, writing, and organizational skills
- Work location to be split approximately 60% in office and 40% in field
- Extended travel possible
- Valid Driver's license
- Ability to lift 50 pounds

Kenvirons' offers a competitive compensation package that includes health, dental, vision, life and disability insurance, matching 401(k) plan, paid leave and holidays, and a great environment for professionals to thrive.
